No big! Got to fill in those blanks! Sorry I skipped that data.

YVD-08

8/31/13

Static was 168.3. Screen was set from 163-183. Filter pack to 155.

Sorry to bother you again, but looking back at some of the updates I noticed that I had never gotten a final water level for YVD-08 as you had stated in this message. Not critical but trying to map all the field pieces together and wondering if the water level in this well had come up overnight.

Thanks again,
Rene

Subject: DOCKET NO. SDWA-10-2013-0080 / Groundwater Monitoring Well Installation Activities - Tuesday, July 30, 2013 Update

Rene,

On Tuesday, July 30, Cascade continued the installation of YVD-08. The boring was advanced to 188 feet bgs. The general lithology consisted of gravelly sand from 58 to 100 feet bgs. Sand from 100 to 130, and sandy gravel from 130 to 188. Groundwater was encountered at 180 feet bgs.

Cascade tripped out the rods and will allow groundwater to stabilize overnight. Installation of YVD-08 will resume Wednesday, July 31, per static water level.

Please let me know if you have any questions.

Thanks,
Lisa Sebesta
